# Introduction

Thank you for your commitment to RICS and the future of the profession by being an assessor.

You have a crucial role in ensuring that only those candidates who demonstrate the professional and technical competency requirements, and highest ethical standards, can become RICS-qualified.

Assessment outcomes must be fair, valid and globally consistent. Candidates come forward from a variety of backgrounds, showing the diversity of the profession, and must all be assessed to the same standard.

All assessors must undertake training to perform the role and sign the *Assessor commitment statement*.

This assessor guide sets out:

- the format and structure of the assessment
- the preparation you will need to carry out
- for Chartered assessments, the approach to interviewing candidates and what happens after the interview
- the basis for your decision to pass or refer a candidate.

The assessor role is both professionally and personally rewarding. It fulfils the requirements for the 'Service to RICS' characteristic when applying for Fellowship. (Note: This is defined as having completed the required training, signed the *Assessor commitment statement* and having met the requirements for a minimum of two years at the time of applying for Fellowship.)

Assessor training counts as structured CPD. Assessment preparation may, where appropriate, count as unstructured CPD, for example, if research is needed into specific legislation relating to a candidate's submission.

The Specialist assessment involves five stages:

1. Eligibility – applicants must meet the qualification and experience requirements.
2. Vetting – an initial application will be reviewed to confirm the applicant has a suitable profile for the assessment.
3. Ethics, RICS Rules of Conduct, and professionalism – all applicants complete the RICS professionalism module and test.
4. Submission – applicants provide evidence of their experience for you to prepare for the final assessment interview.
5. Final assessment interview – applicants are assessed to determine if they are competent to practise as an RICS chartered professional.

Your role as an assessor will begin at the submission stage. This guide will explain the approach you must take to assess Specialist assessment applicants.

## RICS Assessment Platform

As online tool where applicants manage their assessment details, CPD and selected competency records, and prepare their submission for assessment.

As an assessor you will access to the Platform to provide your availability to assess, download candidate submissions and details of each assessment panel you are assigned to.

A short video guide about using the Platform is available at the [Assessments information](#) web page.

# 1 Applicant eligibility

Applicants must have ten years' relevant experience. This is reduced to five years if they have an undergraduate degree (or equivalent professional qualification) and a relevant post-graduate degree (master's level or higher).

## Specialist profile

The definition, indicators and behaviours are designed to allow applicants to demonstrate their senior profile.

### Definition

An individual delivering enhanced services who is recognised for their impact and authority within the profession.

### Indicators

Applicants must be able to demonstrate their responsibility for delivering services in a specialist area of work.

In addition, the following elements of their career may indicate their specialist area of work:

- position in the organisation structure (title, function, decision-making, who else in the organisation provides your level of services)
- publications (articles in journals, technical authorship)
- record of specialist consultancy work
- record of speaker at high level conferences
- recognition from peers, media, professional bodies, or industry stakeholders (adviser, author, contributor, board member)

- appointment by governance or judicial body (expert witness, adviser)
- record of lecturing or formal training
- degree qualification beyond master's level (PhD or similar)
- dispute resolution in a specific technical area.

Note: This list is not exhaustive. Applicants may identify other indicators relevant to their career.

### Behaviours

Within the applicant's specialist area of work they should be able to demonstrate how they:

- pursue opportunities to develop the industry and profession
- advocate best practice standards
- take responsibility to deliver professionalism
- act with integrity to promote responsible business.

Note: They are required to demonstrate at least one behaviour.

## RICS pathway and competencies

In addition to the experience and senior profile requirements, applicants must demonstrate they are working within an RICS pathway and can provide evidence of the required competencies.

## Specialist area of work

When selecting their technical competencies applicants must identify one or two core competencies for the pathway to demonstrate their specialist area of work. One competency must be required to Level 3 as stated in the pathway guide.

All applicants are required to successfully complete the RICS professionalism (ethics) module 12 months prior to their application for final assessment.

The assessment version of the module includes four units:

**Module 1:** Introduction to ethics and professionalism.

**Module 2:** The RICS Rules of Conduct, integrity and professional codes of ethics.

**Module 3:** Ethical topics and considerations.

**Module 4:** Choose your own adventure case study.

The module is assessed via a further 'complex' case study and a multiple-choice question test.

Ethics and the Rules of Conduct must still be assessed as part of the final assessment interview.

RICS assessors must successfully complete the module as part of their initial assessor training.

## 2 Submission

You will have the following information on which to base the interview.

### Application details

The application details include:

- qualifications
- professional body memberships (if any)
- employment history
- statement on specialist profile
- organisation chart or description of the organisation structure (in context of applicant's role).

This will provide you with an overview of the type and level of work the applicant does.

### Declared competencies

A list of the competencies and levels the applicant has selected – you should assess only against this. It will allow you to begin to identify areas of questioning.

### Record of continuing professional development (CPD)

Applicants must complete a minimum of 20 hours CPD in the 12 months prior to assessment.

The hours must be split between structured development and unstructured development. At least 50% must be dedicated to structured.

This information adds to your understanding of the candidate's training and experience and will provide ideas for areas of questioning in the interview.

### Structured CPD

Can be any form of learning activities where there is a structured approach, where learning outcomes can be easily identified, and where the candidate will enhance their knowledge of a particular subject or their professional skills in a way that is relevant to their work.

Typically, this includes attending webinars, seminars, conferences, lectures, workshops.

### Unstructured CPD

Unstructured learning is any self-managed learning that is relevant or related to their role and has a clear learning purpose, but where there is a less structured approach to the learning content and/or learning method.

This could include activities such as private study, on-the-job training, attendance at unstructured seminars or events.

### Activities that do not count as CPD

Any CPD activity, whether structured or unstructured, should be planned wherever possible and be relevant to the candidate's role or specialism. Any activity that does not have a clear learning objective that relates to their role and specialism cannot be considered as appropriate CPD. Activities such as reading, listening to podcasts, networking, social events, unstructured team building or planning events and involvement on boards, committees or clubs that have little or no relevance to the candidate's professional role will not count towards the CPD requirement.

### Case studies

Applicants will submit three case studies (1,000–1,500 words each) based on projects they have worked on. They are recommended to select projects in which they have played a leading role in terms of strategy, management, decision making, problem-solving and client relationship management. The project could be related to a technical or professional service for a client or an internal or external activity/initiative for the applicant's employer/business.

If applicants have worked in more than one country, they must submit at least one case study on a project in the country in which they are being assessed. The applicant's involvement in each project must be within three years of their application for final assessment.

### Case study on specialist area of work

1,000–1,500 words covering a project that demonstrates specialist experience against one or two core technical competencies selected for the pathway (the applicant's specialist area of work). One competency must be required to Level 3.

### Case study on technical competence 1

1,000–1,500 words covering a project that demonstrates experience against a minimum of two technical competencies (different from other case studies) selected for the pathway.

## Case study on technical competence 2

1,000–1,500 words covering a project that demonstrates experience against a minimum of two technical competencies (different from other case studies) selected for the pathway.

Applicants are asked to include the following in each case study:

- a brief overview of the key issues
- an account of their role/personal involvement
- an outline of any problems and the experience used to resolve these problems
- a note of the outcome and successful delivery with emphasis on the role they played.

All case studies should provide evidence of the applicant's specialist profile, relevance of their experience to the pathway and the mandatory competencies, especially conduct rules, ethics and professional practice. For each case study, applicants will state the technical and mandatory competencies they have demonstrated.

## Plagiarism and the use of AI

All assessment submissions must be the candidate's own original work. Use of artificial intelligence (AI) software to generate content for submissions is not permitted.

Candidates may use tools to aid with spelling, grammar and word count.

Candidates who need specific support or who have identified needs should submit a reasonable adjustment application for any other form of technological aid approval.

Candidates **must not** use generative AI software (e.g. ChatGPT) in the production of their assessment submission. Assessors **must not** put any part of a candidate's submission into generative AI software.

RICS will carry out plagiarism and AI detection checks for all submissions. If there are suspicions that a candidate has submitted work that is not their own, they will be subject to investigation and possible RICS Regulatory action.

### 3 Conflict of interest

All RICS members are bound by their professional ethics to ensure the credibility of the final assessment process. In particular, it is important that potential conflicts of interest between assessors and applicants are properly identified and managed.

A conflict of interest arises, in the context of final assessment, where a chairman or assessor is privy to certain information or interests which could influence, or could be perceived as influencing, their decisions in relation to an applicant.

'Influences' could include friendships, loyalties to a firm, or loyalties to fellow members of an organisation. Factors of influence could include the possibility of financial gain or other advantages, whether to the individual panel member or to a person or organisation they are connected with.

There is no definitive list of situations where a conflict would arise. The following is only to illustrate relationships which could give rise to conflict.

- friend
- acquaintance
- any family relationship (even remote)
- neighbour
- friends in common
- colleague past or present
- client
- competitor
- does business with you or your firm.

#### Example questions to ask yourself

- Do I or my firm have an ongoing commercial relationship with the applicant or their firm?
- Has there been any conflict between our firms or the applicant in the past, regarding services provided, or financial charges?
- Could the outcome of the assessment positively/negatively affect the assessors' business interests?

#### 'Personal' versus 'Prejudicial' distinctions

There is a distinction between personal interests and prejudicial interests.

- **'Personal' interests:** in certain circumstances, there may be a connection between the assessor, and the applicant, but this may not present an issue to the applicant in practice. For instance, the individuals may have met at a CPD event or know of one another in a professional capacity.
- **'Prejudicial' interests:** where the assessor either stands to benefit from the outcome of an assessment interview or might otherwise be perceived as being influenced, the assessor must declare the conflict and should recuse themselves from the panel.

#### Before the final assessment interview

- RICS uses all reasonable endeavours to identify and avoid any obvious conflicts of interest, when selecting a panel of assessors, prior to the interview going ahead.
- Once in receipt of the applicant's final assessment documentation the chairperson and assessors should further ensure that they do not have a conflict of interest and if so declare it to RICS, who will decide whether the panel needs to change or is okay to proceed.

If you think a conflict of interest might exist you should declare this immediately and in advance of the interview. You should contact your chairperson and explain the circumstances fully. Together you need to decide whether the personal interest is 'prejudicial'. Could the interest affect your judgement? Would a member of the public reasonably think it could? If it is decided that the personal interest is not prejudicial, the interview can go ahead.

If it is decided that the personal interest is prejudicial, alternative arrangements will be made. The chairperson must inform the RICS team as soon as possible so an alternative assessor can be assigned. If it is the chairperson who has the personal interest, the other assessors should decide whether the interest is prejudicial. If they think it is, or if they cannot agree, the interview should not go ahead. Contact RICS for support and alternative arrangements will be made.

## On the final assessment interview day

In the unlikely event an applicant or panel member does consider there is a conflict of interest, the chairperson should decide whether the interview should go ahead with the panel member in question OR whether the panel member should sit out of the interview. If this is only a two-person panel and a conflict is raised on the day of the interview, then the interview will need to be deferred and rescheduled for another date.

Note: Whenever a potential conflict of interest arises please contact your local RICS office, so they can advise you.

In exceptional circumstances, the panel may include one assessor from the same employer as the candidate. Employers must apply to RICS for this to be considered. Examples where this may be approved are:

- availability of qualified assessors for the specialism
- legislative differences and specialisation of the role.

There must be appropriate separation between the assessor and candidate.

If approved, it will be permitted and monitored by RICS under strict conditions, including a rule that the chair cannot be based at the same employer.

## 4 Final assessment interview

### Interview structure

The interview will take place using video calling technology approved by RICS. Instructions on using the technology, including a tutorial and demonstration, are available separately.

It is essential that all interviews, while having some flexibility, are broadly structured the same. This will allow you to focus on the assessment and ensure each applicant has similar time allocated to the individual elements of the interview. Any deviation may give rise to an appeal if the applicant is referred.

As a guide, the interview follows the structure in the table below. When the applicant joins the video call the chairperson will welcome them, make some introductions and check that everything is set up appropriately before the interview officially starts.

Before the interview starts, the chairperson must ask the applicant if they are fit and well to proceed.

|                                                                                                                                                  |            |
|--------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Applicant's personal introduction                                                                                                                | 10 minutes |
| Discussion of the three case studies and career, addressing the technical and mandatory competencies and the applicant's specialist area of work | 50 minutes |
| Discussion of CPD (if necessary)                                                                                                                 |            |
| Discussion of professional ethics                                                                                                                |            |
| Close of interview                                                                                                                               |            |
| (Note: look for opportunities to discuss ethical issues throughout)                                                                              |            |
| Total                                                                                                                                            | 60 minutes |

There may be very rare occasions where an applicant confirms they are fit and well, but then experiences some type of medical event/issue during the interview.

The panel has a duty of care towards the applicant and may, at their discretion, end the interview at any time on the grounds of health concerns even if the applicant feels well enough to proceed.

When everything is ready the chairperson will ask the applicant to start their presentation. At this point, the one-hour time limit for the interview starts.

A 60-minute interview cannot cover the full extent of the applicant's experience. The panel must cover as many of the competencies as possible within the allocated time.

The interview must be held in a private and appropriate location.

RICS staff or the assessment panel reserve the right to cancel the interview if this is not case. For example, interviews conducted in any form of transport, or location that may hinder the professionalism of the interview process.

You should contact RICS if you require any assistance.

### Assessment approach

Please take account of the applicant's experience and specialist area of work. Your task is to determine whether the applicant is competent to practise as an RICS chartered professional.

You should approach the interview as a professional structured discussion.

The most important thing to bear in mind is that an applicant may be focusing on a narrower area of activities but in significant detail, so no longer covering the full range of pathway competencies. Your emphasis is on the specialist area of work.

Your questions should focus on the applicant's career experience, concentrating mostly on recent experience. The application details and case studies will be a good source of evidence for this.

Be aware that applicants are likely to have had little previous exposure to RICS terminology, so may express the concepts behind the RICS competencies in different ways: you should be prepared to adapt the way you express these concepts so that the applicant understands clearly.

Applicants may have gained experience in some technical competencies earlier in their career, and progressed to more specialised work. It is acceptable to judge an applicant as competent if you are satisfied that the required levels of a competency were achieved at some point in the applicant's experience.

Applicants may also have gained experience from other geographical locations. As an assessor, you will be expected to take a holistic approach and take into consideration and ask questions on also the broader experience gained that has been submitted.

However the applicant must demonstrate they have a working knowledge of the legislation and are competent to practise in the country they are being assessed in.

Use your judgement. If you feel a Level 3 question more appropriate you may start your questioning there; if the applicant answers it competently you may decide that it is unnecessary to go into detail about Levels 1 and 2 and may move on to another competency.

You should be able to identify the mandatory competencies when applicants discuss their career history.

### Access arrangements

RICS makes every effort to protect applicants from discrimination in accordance with the UK *Equality Act* 2010 (the Act) and is committed to equality of opportunity.

**Reasonable adjustments:** When applying for an assessment, RICS must consider requests for a reasonable adjustment where an applicant, who is disabled as defined by the Act, would be at a substantial disadvantage in comparison to someone who is not disabled.

A reasonable adjustment must be based on the individual needs of the applicant and their ability to access an assessment.

You will be informed if an adjustment has been agreed and given appropriate guidance.

**Special consideration:** defined as a consideration given to an applicant who has temporarily experienced a significant personal difficulty at the point of taking an assessment.

For further information, refer to: [Access Arrangements](#).

## Audit and quality assurance

We are committed to ensuring rigorous processes for the chartered qualification (MRICS) so that employers, clients and the public can have confidence that anyone achieving it, is competent to practise as a chartered surveyor.

### Use of video and microphone

The applicant must have their video and microphone on throughout the video call so the assessment panel can be assured they do not have access to any support that provides, or could be perceived as providing, them with an advantage during the interview.

Before the interview starts, the chairperson will ask the applicant to complete a 360-pan of their surroundings, including the area above them, their desktop and the floor area in front of them.

The chairperson may also request that the applicant shares their screen to confirm they do not have their submission open or are using AI software to aid them during their interview. The chairperson may ask this at any point during the interview.

### Staff facilitator role

An RICS staff member trained to perform the staff facilitator role may be present on the video call. The purpose of the staff facilitator is to support the panel and applicant with the use of the video call technology. They will not participate in the interview or any pre- or post-interview discussions with the panel. Their video will be off and microphone muted for the duration of the video call unless there is a technology issue or any other unforeseen

issue that requires them to intervene. Any intervention by the staff facilitator would be recorded as an approved interruption by the chairperson.

### Auditor role

An auditor trained by RICS may be present on the video call. The purpose of the auditor is to observe the performance of the assessment panel, ensuring the process and policies for the assessment are being followed.

They will not participate in the interview or any pre- or post-interview discussions about the applicant; their role is simply to observe.

They will use their video and microphone to introduce themselves before the interview starts; their video will be off and microphone muted for the duration of the interview unless they are instructed otherwise by the chairperson or staff facilitator.

You should be prepared to share your assessment preparation work with them. At the end of the post-interview discussion the auditor will provide you with feedback. They are there to help and advise as well as provide quality assurance of the assessments.

The auditor report will also be used if the applicant appeals the result of their assessment.

### Recording assessments

RICS may audio or video record the assessment. This will be used solely for the purpose of assessor standardisation and training.

If the interview is going to be recorded, you will be given prior notice by RICS. Interviews may not be recorded by the candidate or any of the assessment panel.

### Panel decision

The applicant should demonstrate technical competence (achieved at some point in their career).

You should apply the most weight to the area of specialism and the level of enhanced service they offer. As a recognised authority a specialist applicant should set an example and dictate how services are delivered. Ethics are therefore of vital importance and you must ensure you cover this in your decision.

Your decision should be based broadly on the following priorities.

|                                                           |     |
|-----------------------------------------------------------|-----|
| Specialist area of work and specialist profile            | 50% |
| Technical pathway competencies and mandatory competencies | 25% |
| Ethics and professionalism                                | 25% |

### Result

The result will be pass or refer. If you refer an applicant the chairperson is required to produce a referral report.

### Referral reports

While it is the chairperson who writes the referral report, it needs to be agreed by the full panel. You should jointly decide why a particular competency has not been achieved and what further advice should be given to the applicant.

The report should focus on the applicant's competency deficiency. You need to provide constructive comments that clearly state the deficiencies and how to rectify them. The comments should encourage applicants to apply for final assessment again.

When referring applicants, you are not refusing access to the RICS qualification but are advising applicants on how they can improve in order to achieve the RICS qualification.

Whatever the main focus of the referral report, the chairperson should cover all aspects that led to the decision, however minor they may seem, to provide thorough guidance for the applicant's development.

Focus only on the applicant's deficiencies. If you are satisfied that a competency has been achieved, you should not mention it in your report. Future panels can be compromised if you do.

You may also wish to give positive reinforcement that is not specific to a competency. For example, you could comment on the applicant's presentation or confidence during the interview.

The report must:

- identify the reasons for the referral – the reasons should be factual, accurate, simply
- expressed and linked to the competencies
- contain enough information to support the referral, with comments and guidance where necessary
- use short sentences and paragraphs
- be personal to the reader ('you have been referred')
- do not use jargon
- recommend further experience or study that the applicant should be able to identify and achieve.

If the applicant has been referred, the chairperson should cover the following:

- explain why the referral decision was reached
- provide guidance and advice to enable the applicant to be successful in the near future.

Any major concerns about the applicant's suitability should be discussed with RICS. Advice and guidance should be provided and, in particular, any specific advice about presentation or interview skills. RICS will contact the applicant to discuss the next steps and send a referral pack.

From 1 January 2026, applicants have up to four attempts to pass the Chartered assessment and can apply for a fifth and final attempt after completing a period of 12 months' further experience. Any attempts prior to 1 January 2026 do not count towards the total allowed.

## Delivering confidence

We are RICS. As a member-led chartered professional body working in the public interest, we uphold the highest technical and ethical standards.

We inspire professionalism, advance knowledge and support our members across global markets to make an effective contribution for the benefit of society. We independently regulate our members in the management of land, real estate, construction and infrastructure. Our work with others supports their professional practice and pioneers a natural and built environment that is sustainable, resilient and inclusive for all.
