## RICS Building Surveying Conference

Venue: Convene 155 Bishopsgate

## Thursday 7 May 2026

8:30	Networking & registration	on			
9:30	Welcome remarks from the conference chair *Broadgate Room*				
	Helen McKeown MRICS, Co-Founder, Axis Surveying Limited				
9:45	Economic and industry outlook				
	As the economic, regulatory and technological landscape shifts, the building surveying profession must adapt. Join the conference's opening session to gain insights into emerging demand drivers and concerns about the building surveying skills gap.				
	Rob Elder, Agent, Greater London, Bank of England				
10:05	Building Safety Act: Case law and compliance challenges				
	This session provides a practical update for building surveyors on navigating the Building Safety Act (BSA). With stricter scrutiny of Gateway submissions and a growing backlog of cases, surveyors face pressure to prepare robust, defensible documentation. Using recent case law, the session explores responsibilities around legacy cladding, complex refurbishments, and overlapping warranties. Join to gain guidance on managing conflicts between BSA duties, warranties, and professional indemnity.				
	Tim Hillier, Partner, Trowers & Hamlins LLP				
10:50	Networking break				
11:25					
	Trevor Rushton FRICS FCABE ACIArb, Group Chairman, Watts				
12:15	Split into breakout rooms				
Room	Breakout stream A: London Wall Chair: Samantha	Breakout stream B: Broadgate Chair:	Breakout stream C: Bishopsgate Chair: James Baker		
	Organ FRICS, ESG		<b>FRICS,</b> Managing Director, Invise ITD		

	Director, Black Cat	Helen McKeown			
	Building Consultancy	MRICS, Co-Founder,			
		Axis Surveying Limited			
12:20	1a: Retrofit strategies and delivering low-carbon performance across building types  Surveyors are increasingly central to delivering energy-efficient, low-carbon upgrades across residential and commercial buildings. This session explores practical approaches to sustainable retrofit, covering assessment of existing fabric, specifying insulation and ventilation improvements, and integrating low-impact materials without compromising structural integrity. Join to learn strategies for balancing environmental performance, regulatory compliance, and client expectations in retrofit projects.				
	Carolina Lopato Ricorico MRICS, Senior Project Manager, HartDixon				
12:20	1b. Fire safety and regulations: Façade systems, defects, and professional risk				
	This session provides practical guidance on navigating the current fire regulatory framework. Delegates will learn how to identify and assess façade defects, evaluate external wall systems and insulation for fire rand verify material classification and installation integrity. Participants also explore strategies to manage duty of care, professional liability, a regulatory responsibilities to maintain safe and compliant building practices.				
	<b>Benjamin Ralph PhD CEng FIFireE FIMechE,</b> Director, Head of Building Safety and Fire, Hollis				
12:20	1c. Party walls, boundaries, and neighbourly disputes				
	challenge in England an provides building survey conflicts from escalating the session will illustrate	oundaries, and rights of lig d Wales's dense built envir ors with practical guidanc g into costly legal battles. I e key principles, dispute re es for managing neighbour	onment. This session e on preventing minor Jsing recent case studies, solution strategies, and		
	Irene F Moore LLB, Partner & Party Walls and Neighbourly Matters Surveyor, Fetto Moore & Co				
13:05	Lunch				
14:05	2a. Historic buildings and the challenges of retrofit				
		d conservation-area contex ng heritage value, regulato	•		

	sustainability demands. This session will examine how surveyors evaluate		
	the performance and suitability of sustainable materials in a conservation		
	context while managing heritage risks and retrofit sensitively.		
14:05	2b. Responsible AI use and professional standards		
	As AI-driven tools become embedded in surveying practices, building		
	surveyors are under growing pressure to ensure their use of technology		
	meets professional and ethical standards. The new RICS Professional		
	Standard on Artificial Intelligence Governance sets out how members must		
	manage transparency, accountability, and fairness when using or relying on		
	All systems in their work. Investigate how to apply good governance when		
	using AI and ensuring your results remain explainable, defensible, and		
	aligned with client expectations.		
14:05	2c. New challenges and legal updates in dilapidations		
1-4.00	20. 11011 offactorigod and togat apparted in altaplactions		
	Dilapidations remain a cornerstone of building surveying, but the landscape		
	is shifting fast. Cost escalation, sustainability mandates, and evolving case		
	law are changing how liabilities are assessed and negotiated. Join to		
	uncover key challenges and trends shaping dilapidations practice.		
	Claire Hood MRICS, Director, Savills

	Dawn Williams FRICS MCABE, Director and Chartered Building Surveyor, Eos Surveying		
14:55	3c. Strengthening client communication and reporting		
	Building surveyors produce complex technical findings every day, but the value of these insights depends on how clearly, they are communicated. Join to learn advanced strategies for producing client-ready reports, presenting technical risk, and leading communication within project teams. Through case studies, practical examples, and expert guidance, participants will refine skills in both written and verbal communication. Building your communication skills can help manage high-stakes projects, mentor junior surveyors, and reduce the potential for disputes.  Jay Ridings MRICS, Senior Director, Tuffin Ferraby Taylor, LTD		
15:40	Networking break		
16:10	Closing keynote speech / Open forum		
16:55	Chair closing statement Helen McKeown MRICS, Co-Founder, Axis Surveying Limited		
17:00	Conference end
