The RICS 2026 Conference explores how Hong Kong can shape a resilient, future-ready built environment through policy insight, strategic development, and technological advancement. Centred on the city's evolving role within the Greater Bay Area, the conference examines the impact of China's 15th Five-Year Plan, the transformative potential of the Northern Metropolis, and the urgent need to address urban ageing and renewal challenges. It also highlights the growing influence of AI and digital innovation in surveying and construction. Bringing together government leaders, industry experts, and technology pioneers, the conference aims to equip professionals to lead Hong Kong's next decade of sustainable growth.

As a premier platform for influential stakeholders from government, industry, and academia, this forum will explore key developments in public-private partnerships, technological innovation, and sustainable finance—critical drivers shaping the future of the built environment. Through insightful discussions and expert-led sessions, participants will gain valuable perspectives on emerging market trends, policy directions, and investment strategies that will define Hong Kong's competitiveness on the global stage.

Attendees will engage in thought-provoking exchanges to craft a strategic blueprint for a more adaptive and internationally integrated city. By fostering collaboration and knowledge sharing, this conference will empower professionals to lead the next wave of transformation, ensuring a future-ready property market that meets the evolving demands of businesses, investors, and communities.

Join us to be part of this essential dialogue—where expertise meets vision, innovation drives progress, and new pathways emerge for Hong Kong's built environment.

Keynote / The 15th Five-Year Plan: Shaping Hong Kong's Future

This keynote will explore the strategic direction set out in the 15th Five-Year Plan and its implications for Hong Kong's development. It will examine how national priorities in innovation, technological advancement and high-quality growth are shaping opportunities for the real estate and construction sectors, including infrastructure, urban development and regional integration within the Greater Bay Area. The session will also provide insights on how Hong Kong can strengthen its role as an international hub by aligning with national development priorities and contributing to a more integrated regional economy.

The Honourable Mrs Regina IP LAU Suk-ye, GBM, GBS, JP

10:40

Keynote / The Northern Metropolis: A New Engine for Integration and Innovation

This keynote will examine the Northern Metropolis as a key growth engine for Hong Kong and its role in advancing Hong Kong–Mainland integration and Greater Bay Area connectivity. It will explore how the development supports innovation-led growth, new industries and talent development, while outlining key planning priorities, infrastructure delivery and cross-boundary coordination needed to shape a more connected, sustainable and resilient Hong Kong.

11:05

Panel / Delivering the Northern Metropolis

This panel will examine how the Northern Metropolis can be delivered as a large-scale, integrated development, focusing on key components such as logistics clusters, the University Town and innovation hubs. It will explore new delivery and procurement approaches, including PMO and PDSA models, alongside infrastructure planning and cross-agency coordination. The discussion will also address how stronger alignment across stakeholders can accelerate delivery and unlock long-term economic value.

Moderator: **Hannah Jeong MRICS**, Head of Valuation and Advisory Services, CBRE Hong Kong

Panellists:

Ir John Kwong Ka Sing, Vice President for Development, HKUST

Ir Michael FONG Hok Shing, JP, Director, Civil Engineering and Development

Roger Nissim FRICS

Panel / Rethinking Urban Renewal: Safety, Governance and Resilience in Hong Kong

This panel will examine how Hong Kong can address the growing risks posed by ageing buildings and infrastructure amid the city's "double ageing" challenge. Discussions will cover building safety, maintenance gaps and regulatory oversight, and explore how stronger property management practices, procurement integrity and reinforced governance frameworks can accelerate urban renewal and enhance long-term resilience.

Moderator: **Ling Lam FRICS**, Consultant, Rider Levett Bucknall

Panellists:

CK Lau MRICS, Managing Director, Hong Kong and Managing Director, Asia Valuation and Advisory Services, Colliers International (Hong Kong) Limited

Prof Ling Kar-kan, SBS, Chairman of HK Housing Society; Former Director of Planning, Planning Department; Senior Advisor, The Hong Kong Polytechnic University

15:10

Keynote / AI and the Future of Hong Kong's Built Environment

This keynote will examine the strategic role of artificial intelligence in shaping the future of Hong Kong's construction and built environment sector, with a focus on project delivery and governance. Drawing on PSGO's role in overseeing major infrastructure projects, the session will highlight how AI can enhance planning, risk management and delivery efficiency. It will also explore pathways to scale adoption and strengthen Hong Kong's position as a leading hub for innovation, productivity and sustainable development.

15:35

Panel / Navigating the AI Era: Transforming the Built Environment

Artificial intelligence and advanced analytics are reshaping the built environment, requiring surveyors to evolve beyond traditional roles and adopt AI to drive productivity, smarter decision-making, and seamless project delivery. This expert panel of industry practitioners will explore real-world AI applications and adoption challenges, while offering insights on future developments, standards, and innovation pathways to support wider implementation across the sector.

Moderator: **Patrick Wong FRICS**, Head of Bloomberg Intelligence

Panellists:

Damien Wu, Chief Innovation Officer, Urban Renewal Authority

Jennifer Tan, Senior Advisor, Ant Digital Technologies

Sherry Wong, General Manager, Building Operations, Hongkong Land Limited

16:35

Closing address

Delivering confidence

We are RICS. Everything we do is designed to effect positive change in the built and natural environments. Through our respected global standards, leading professional progression and our trusted data and insight, we promote and enforce the highest professional standards in the development and management of land, real estate, construction and infrastructure. Our work with others provides a foundation for confident markets, pioneers better places to live and work and is a force for positive social impact.
