To access the full profile of the EWS Assessment Training Programme successful completers, please click on their member numbers.

Successful course completers should be capable of completing Option A or Option B of the EWS1 form below 18m but should self-assess their own competence and if the building is very complex or high risk, should consult an IEng or CEng fire engineer for advice on Option B if in any doubt. For high-risk residential buildings above 18m, it is still expected that this will be carried out by an Incorporated Engineer (IEng) or a Chartered Engineer (CEng) registered with the Engineering Council by the IFE (or other professional body if demonstrable fire engineering competence), although a survey report of the wall by course completers may be instructed for a fire engineer to make the overall assessment.
