

Q1 2018: Croatia Commercial Property Monitor

Demand continues to rise in the office and retail sectors

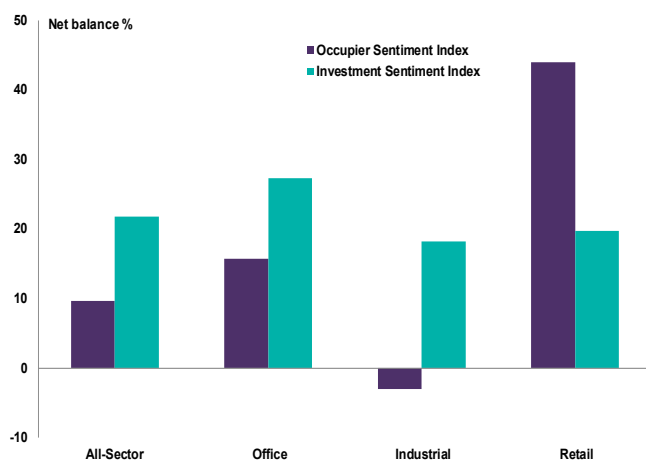

Occupier Market

- The Occupier Sentiment Index (a composite indicator capturing momentum) came in at +10 slightly down from the +18 reading in Q4. When disaggregated, the index picked up significantly in the retail portion of the market and was firm in the office sector. Meanwhile, momentum moderated in the industrial market.
- Occupier demand continued to rise at the headline level and at a similar pace relative to the previous quarter. Within this, demand growth was solid across the office and retail sector but was only marginal for industrial space
- Availability was broadly unchanged at the headline level, although respondents did note a decline across the office sector.
- The value of incentive packages increased over the quarter having remained broadly flat for almost two years. What's more, each sector saw an increase in inducement levels.
- Rental projections for the coming year were revised down somewhat across all sub-markets in Q1. In keeping with stalling momentum across the industrial sector, contributors expect both prime and secondary industrial rents to remain broadly unchanged. At the other end of the scale, office (both prime and secondary) and prime retail rents are anticipated to post solid growth over the next twelve months.

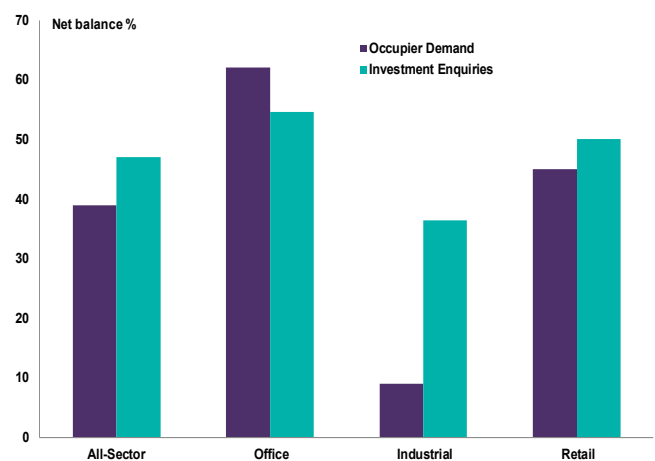

Investment Market

- The Investment Sentiment Index moved to +16 from +22 previously. Although momentum did ease slightly across all three sectors, this measure is still consistent with further improvements across the investment market over the quarter.
- Investor demand continued to increase at a similar pace to that in the previous quarter. Breaking this down, demand continued on an upward trajectory in all areas of the market, with the office sector once again displaying the firmest results. Meanwhile demand from foreign investors also continued to increase firmly across the board.
- The supply of property on the market for investment purposes increased, with a net balance of +28% of respondents citing a rise during Q1. Furthermore, supply reportedly increased across all sectors.
- Contributors trimmed their capital value projections for the year ahead. The prime retail and office sub-sectors are expected to see the strongest gains while, capital value projections for assets in secondary locations were more or less flat for the year ahead.
- 83% of respondents believe the market is in the early to middle stages of an upturn.

Occupier and Investment Sentiment Index

Occupier Demand and Investment Enquiries

Commercial Property Market

Market Valuations - The majority of respondents (83%) sense the commercial property market offers at least fair value for investors. Nevertheless, 17% do now sense prices are somewhat stretched.

Credit Conditions - On balance, credit conditions reportedly eased in Q1, with 75% of respondents noting some degree of improvement.

12m Capital Value Expectations - Respondents scaled back capital value projections in each sub-sector compared with the previous results. Nevertheless, prime retail and office value are still expected to post solid gains, although the outlook is flat across all secondary markets.

12m Rental Expectations - Average rental growth expectations were revised lower in Q1 relative to Q4, particularly across prime locations. Nevertheless, the rental outlook remains solid for prime office and retail rents.

Information

Global Commercial Property Monitor

RICS' Global Commercial Property Monitor is a quarterly guide to the trends in the commercial property investment and occupier markets. The report is available from the RICS website www.rics.org/economics along with other surveys covering the housing market, residential lettings, commercial property, construction activity and the rural land market.

Methodology

Survey questionnaires were sent out on 14 March 2018 with responses received until 11 April 2018. Respondents were asked to compare conditions over the latest three months with the previous three months as well as their views as to the outlook. A total of 1748 company responses were received, with 385 from the UK. Responses for Ireland were collated in conjunction with the Society of Chartered Surveyors Ireland. Responses for Spain and Portugal were collated in conjunction with Iberian Property. Responses for New Zealand were collated in conjunction with Property Council New Zealand.

Responses have been amalgamated across the three real estate sub-sectors (offices, retail and industrial) at a country level, to form a net balance reading for the market as a whole.

Net balance = Proportion of respondents reporting a rise in a variable (e.g. occupier demand) minus those reporting a fall (if 30% reported a rise and 5% reported a fall, the net balance will be 25%). Net balance data can range from -100 to +100.

A positive net balance reading indicates an overall increase while a negative reading indicates an overall decline. The RICS Occupier Sentiment Index (OSI) is constructed by taking an unweighted average of readings for three series relating to the occupier market measured on a net balance basis; occupier demand, the level of inducements and rent expectations. The RICS Investment Sentiment Index (ISI) is constructed by taking an unweighted average of readings for three series relating to the investment market measured on a net balance basis; investment enquiries, capital value expectations and the supply of properties for sale..

Confidence through professional standards

RICS promotes and enforces the highest professional qualifications and standards in the development and management of land, real estate, construction and infrastructure. Our name promises the consistent delivery of standards – bringing confidence to the markets we serve.

We accredit 118,000 professionals and any individual or firm registered with RICS is subject to our quality assurance. Their expertise covers property, asset valuation and real estate management; the costing and leadership of construction projects; the development of infrastructure; and the management of natural resources, such as mining, farms and woodland. From environmental assessments and building controls to negotiating land rights in an emerging economy; if our members are involved the same professional standards and ethics apply.

We believe that standards underpin effective markets. With up to seventy per cent of the world's wealth bound up in land and real estate, our sector is vital to economic development, helping to support stable, sustainable investment and growth around the globe.

With offices covering the major political and financial centres of the world, our market presence means we are ideally placed to influence policy and embed professional standards. We work at a cross-governmental level, delivering international standards that will support a safe and vibrant marketplace in land, real estate, construction and infrastructure, for the benefit of all.

We are proud of our reputation and we guard it fiercely, so clients who work with an RICS professional can have confidence in the quality and ethics of the services they receive.
